INDEX TO VOLUME 10, FOREST SCIENCE, 1964

Art.—article; rev.—review; art. (rev.)—review of article or book by.

Authors are indicated by capitals.

Absorption of stemflow by bark of young red and white pines. art. 277
Acrylic resin tubes for studying root growth in tree seedlings. art. 461
Agromizid cambium miners and barkbeetles. Defects on black cherry caused by. art. 258
ALEXANDER, ROBERT R. art. 130
ALLEN, R. M. art. 14
Analysis, regressive. Limits for the sum of predictions in. art. 300
Apparent photosynthesis of Douglas-fir in relation to silvicultural treatment. art. 432
ASHER, WILLIAM C. art. 116
Aspen, isolated triploid tissue. The culture of. art. 35
Aspens: Phoenix trees of the Great Lakes region. rev. 452
Atmospheric constituents, unidentified. Injury to eastern white pine by. art. 2
Barkbeetles and agromizid cambium miners. Defects in black cherry caused by. art. 258
BARRETT, J. P. art. 159
BARRETT, James P. art. 52
Base lines for judging wood quality of loblolly pine. art. 165
BAUGHMAN, WILLIAM D. art. 361
BENGTSON, G. W. art. 159
BERRY, CHARLES R. art. 2
BETHEL, JAMES S. art. 89
BILAN, M. VICTOR art. 461
BLISS, C. I. art. 350
BONGA, J. M. art. 77
BOYCE, J. S. art. (rev) 205
BUKOVAC, MARTIN J. art. 330
BURLEY, JEFFERY art. 206
Carrying capacity of wild lands for recreation. The. For. Sci. Monog. 7 (a separate)
Cation-exchange properties, mineral composition and uronic acid content of various tissues of conifers. art. 415
Causes and effects of horizontal density variation in tree stems. Some. art. 24
CHAPPELLE, DANIEL E. art. 471
Chemical anaysis of sugar maple sap and foliage as related to sap and sugar yields. art. 288
Chemical control of weeds. rev. 205
Chemical wood utilization. rev. 282
Cherry, black, defects in. Caused by barkbeetles and agromizid cambium miners art. 258
Cobalt-60. Radiosensitivity of jack pine seed to art. 293
Color of immature cones of several pacific northwest conifers. art. 103
Cone insect, population fluctuations. A six-year plot study on Douglas-fir. art. 124
Cones, immature. Color of. Of several Pacific Northwest conifers. art. 103
Conifer canopies, solar radiation beneath. In relation to crown closeure. art. 443
Contribution of different-aged needles to growth and wood formation of young red pines. art. 224
Contributions of roots, stems, and leaves to height growth of longleaf pine. art. 14
Correction for edge effect bias in point-sampling. art. 52
Crown closure. Solar radiation beneath conifer canopies in relation to. art. 443
Crown expansion and stem radial growth of Douglas-fir as influenced by release. art. 192
Crown ratio, live. And stand density in young, even-aged, red oak stands. art. 56
Cottonwood flowering as related to cold requirement of flower buds. art. 296
CROOKE, W. M. art. 415
Culture of isolated triploid aspen tissue. The. art. 35
CURTIS, ROBERT O. art. 241
Curves, site-index. Numerical construction of. art. 410
CUNIA, T. art. 180
DAMMAN, A. W. H. For. Sci. Monog. 8 (a separte)
DE BYLE, NORBERT V. art. 386
Defects in black cherry caused by barkbettles and agromizid cambium miners. art. 258
Depth to water table. Effect of on height growth of tree seedlings in a greenhouse art. 306
Density, stand. And live crown ratio in young, even-aged red oak stands. art. 56
Density, variation, in tree stems. Causes and effects of horizontal. Some. art. 24

Detection of functional intraclonal aspen root connections by tracers and excavation. art. 386
Determination of volume by means of the relascope. art. 51
Developing architecture of secondary xylem in conifers. The. art. 89
Diameter distribution, an expression of. For unbalanced, uneven-aged stands and forests. art. 39
Diameter distribution and growth of loblolly pine. art. 105
Diameter distributions in even-aged stands. A lognormal approach to. art. 350
DOERNER, KARL, Jr. art. 24
Douglas-fir, apparent photsynthesis of in relation to silvicultural treatment. art. 432
Douglas-fir cone insect population fluctuations. A six-year study on. art. 124
Douglas-fir. Crown expansion and stem radial growth of. As influenced by release art. 192
Douglas-fir locality in southern califorinia. A new. art. 317
Dougals-fir. Rooting of cuttings from mature. art. 319
Douglas-fir seed. Effect of photoperiod and light quality on germination of. art. 200
Douglas-fir, seedlings. Octamethylpyophosphoramide (OMPA) as a systemic animal repellent for. art. 93
Drought and nitrogen. The effects of on loblolly pine seedlings. art. 143
Earlywood-latewood features of red pine grown under simulated drought and irrigation. art. 361
Economics of the American lumber industry. rev. 114
Effects of nitrogen and drought on loblolly pine seedlings. art. 143
EINSPAHR. DEAN W. art. 165
Electrical potentials related to reproduction and vigor in slash pine. art. 116
Environmental factors. Some forest types of central New Foundland and their relationship to. For. Sci. Monog. 8 (a separate)
Esimation of optimal stocking levels and rotation ages of loblolly pine. art. 471
Expression of diameter distribution for unbalanced, uneven-aged stands and forest. The art. 39
FARMER, ROBERT E., JR. art. 296
Federal conservation policy, 1921–1933 rev. 92
Fertilization in white pine. Weevil infestation in relation to. art. 428
Fertilization, on red pine plantations. Some long-time effects of. art. 17
Flowering, cottonwood, as related to cold requirement of flower buds. art. 296
Flowering, in eastern white pine. Stimulation of. art. 28
Folair nutrients, relationships of. To growth of red pine in western Massachusetts. art. 337
Foliage and wood production in unthinned black spruce in northern Quebec. art. 80
Food reserves and rough bark formation in pine roots. art. 174
Forest mensuration, Italian textbook of rev. 451
Forest types of central New Foundland and their relationship to environmental factors. Some. For. Sci. Monog. 8 (a separate)
Forestry and forest industry in Norway. rev. 276
Forestry and its career opportunities rev. 329
Forestry theses accepted by colleges and universities in the United States. art. 371
Formation of wood in forest trees. The rev. 320
FOWLER, D. P. art. 335
FRANKLIN, JERRY R. art. 103
FREEMAN, FRED W. art. 330
Gibberellic acid on seed fermination of sitka spruce. Effect of. art. 206
GRAHAN, SAMUEL A. rev. 452
GRIFFIN, JAMES R. art. 317
Growth and diameter distribution of loblolly pine. art. 105
Growth and wood formation of young red pines. Contribution of different-aged needles to. art. 224
Growth, height, of longleaf pine. Contributions of roots, stems, and leaves to. art. 14
Growth, height. Of tree seedlings in a greenhouse. Effect of depth to water table on. art. 306
Growth, height. Planted yellow-poplar in southwestern Michigan. Nutritional relationships affect of. art. 66
Growth of ponderosa pine. A measure of the effect of soil and atmospheric moisture on the. art. 454
Growth of red pine plantations in relation to fertility of non-phreatic sandy soils. art. 463

Growth, root, in tree seedlings. Acrylic resin tubes for studying. art. 461
Growth, stem radial, and crown expansion. Of Douglas-fir as influenced by release. art. 192
HACSKAYLO, EDWARD art. (rev.) 213
HARLAND, R. art. 80
HARRISON, ROBERT P., JR. rev. 452
HEDLIN, A. F. art. 124
HEIBERG, SVEND O. art. 17
HELMS, JOHN A. art. 432
HEPTING, G. H. art. 174
HEPTING, GEORGE H. art. 2
HOYLE, MERRILL C. art. 337
Injury to eastern white pine by unidentified atmospheric constituents. art. 2
Interception, throughfall, and stemflow in Utah and alligator juniper cover types northern Arizona. art. 283
Intraclonal aspen root connections, detection of. By tracers and excavation. art. 386
IRGENS-MOLLER, HELGE art. 200
Irradiation, grama. Of male flower buds and muture pollen in quercus. Effects of chronic and acute. art. 397
Insect population fluctuations. A six-year plot study of Douglas-fir cone. art. 124
Isolation of mycorrhizal fungi from roots of individual slash pines. art. 214
IYER, J. G. art. 463
Jack pine seed, radiosensitivity of. To cobalt–60. art. 293
JACKSON, L. W. R. art. 174
Juniper, alligator. Cover types of northern Arizona. Interception, throughfall, and stemflow in Utah and. art. 283
JOHNSON, LEROY C. art. 200
KEAY, J. art. 415
KNIGHT, A. H. art. 415
KRAMER, PAUL J. art. 143
KUHLMAN, E. GEORGE art. 151
KULMAN, H. M. art. 258
KUIJT, JOB art. 78
KURTH, H. CHEMISCHE rev. 205
Laboratory seed separator, A. art. 222
LA CROIX, J. DONALD art. 293
Lammas growth and prolepsis in jack pine in the Lake States. For. Sci. Monog. 6 (a separate)
LAMMI, J. O. art. (rev) 92
LARSON, PHILIP R. art. 224
LAWRENCE, WILLIAM H. art. 93
LEAF, ALBERT L. art. 17, 288, 428
LEAK, WILLIAM B. art. 39
Light during stratification hastens dark-germination of loblolly pine seed. art. 348
Light quality and photoperiod on germination of Douglas-fir seed. Effect of. art. 200
Limits for the sum of predictions in regressive analysis. art. 300
Line intersect technique for asessing logging waste. A. art. 267
Live crown ratio and stand density in young, even-aged, red oak stands. art. 56
Loblolly pine. Estimation of optimal stocking levels and rotation ages of. art. 471
Loblolly pine seed. Light during stratification hastens dark-germination of. art. 348
Logging waste. A line intersect technique for assessing. art. 267
Log-grading and timber appraisal. On. art. 239
Lognormal approach to diameter distributions in even-aged stands. A. art. 350
Long-time effects of fertilization on red pine plantations. Some. art. 17
LOTAN, JAMES E. art. 361
LYR, H. rev. 213
MACE, ARNETT C., JR. art. 454
MADER, Donald L. art. 337
MADGWICK, H. A. I. art. 17
MAKI, T. E. rev. 453
Maple, sugar. Chemical analysis of sap and foliage as related to sap and sugar yields. art. 288
MARX, DONALD H. art. 214
MATHES, MARTIN C. art. 35, 165
McLEMORE, B. F. art. 348
MEAD, WALTER J. art (rev) 114
Measure of the effect of soil and atmospheric moisture on the growth of ponderosa pine. A. art. 454
Method for approximating forest multiple-use optima. A. art. 209
Mineral composition, cation-exchange properties and uronic acid content of various tissues of conifers. art. 415
Minimizing windfall around clear cuttings in sprice-fir forests. art. 130
Mistletoe, eastern dwarf. An unusual witches' broom on black spruce caused by. art. 77
Mistletoes, dwarf. Vegetative propagation of. art. 78
Moisture, atmospheric. On the growth of ponderosa pine. A measure of the effect of. art. 454
MUELLER-DOMBOIS, DIETER art. 306
MUHLENBERG, NICHOLAS art. 209
Multiple-use optima. A method for approximating forest. art. 209

Mutant, deleterious in red pine. A pre-germination selection against. art. 335
Mycorrhizal, fungi, isolation of. From roots of individual slash pines. art. 214
MYKORRHIZA rev. 213
Needles, different-aged. Contribution of to growth and wood formation of young red pines. art. 224
NELSON, THOMAS C. art. 105, 471
Nitrogen and drought. The effects of on loblolly pine seedlings. art 143
Non-phreatic sandy soils. Growth of red red pine plantations in relation to fertility of. art. 463
Numerical constructions of site-index curves. art. 410
Nutrients, folair relationships of. To growth of red pine in western Massachusetts. art. 337
Nutritional relationships affecting height growth of planted yellow-poplar in southwestern Michigan. art. 66
Oak, red. Live crown ratio and stand density in young, even-aged stands. art. 56
Oaks, young red, growing in even-aged stands. Potential tree grade of. art. 321
Octamethylpyrophosphoramide (OMPA) as a systemic animal repellent for Douglas-fir seedlings. art. 93
Oleoresin yields for slash pines from seven seed sources. art. 159
OLSEN, P. F. art. 267
O'REGAN, WILLIAM G. art. 239, 300
OSBORN, KATHERINE H. art. 371
Pathogenicity and survival of *phytophthora cinnamomi* in several western Oregon soils. art. 151
PATRONE, GENEROSO rev. 451
PAULEY, SCOTT S. art (rev) 452
PECH, GY. art. 443
PECKHAM, JOHN R. art. 165
PERRY, T. O. art. 302
PHARIS, RICHARD P. art. 143
Photoperiod and light quality on germination of Douglas-fir seed. Effect of. art. 200
Phytophthora cinnamomi, survival and pathogenicity of. In several western Oregon soils. art. 151
Photosynthesis, Apparent. Of Douglas-fir in relation to silvicultural treatment art. 432
Pine, eastern white, Injury to. By unidentified atmospheric constituents. art. 2
Pine, eastern white. Stimulation of flowering in. art. 28
Pine, jack. Lammas growth and prolepsis in the Lake States. For. Sci. Monog. 6 (a separate)
Pine, loblolly. Base lines for judging wood quality of. art. 165
Pine, loblolly. Diameter distribution and growth of. art. 105
Pine, loblolly, seedlings. The effects of nitrogen and drought on. art. 143
Pine, longleaf. Contributions of roots, stems, and leaves to height growth of. art. 14
Pine, ponderosa. A measure of the effect of soil and atmospheric moisture on the growth of. art. 454
Pine red. Plantations in relation to fertility of non-phreatic sandy soils. Growth of. art. 463
Pine, red, plantations. Some long-time effects of fertilization on. art. 17
Pine, slash. Electrical potentials related to reproduction and vigor in. art. 116
Pine, white. Weevil infestation in relation to fertilization in. art. 428
Pines, slash. Isolation of mycorrhizal fungi from roots of individual. art. 214
Pines, slash, oleoresin yields for. From seven seed sources. art. 159
Pines, young red. Contribution of different-aged needles to growth and wood formation of. art. 224
Point-sampling. Correction for edge effect bias in. art. 52
Pre-germination selection against a deleterious mutant in red pine. art. 335
PRESTON, RICHARD J., JR. art. (rev) 329
Proceedings, special field institute in forest biology. rev. 453
Prolepsis and lammas growth in jack pine in the Lake States. For. Sci. Monog 6. (a separate)
Radiosensitivity of jack pine seed to cobalt –60. art. 293
RAWALD, W. rev. 213
Recreation. The carrying capacity of wild lands for. For. Sci. Monog. 7 (a separate)
REDISKE, J. H. art. 93
Red pine and white pines, young. Absorption of stemflow by bark of. art. 277
Red pine grown under simulated drought and irrigation. Earlywood-latewood features of. art. 361
Red pine. Pre-germination slection against a deleterious mutant in. art. 335
Red oaks, young. Growing in even-aged stands. Potential tree grade of. art. 321

REINKER, K. A. art. 350
Relascope. Determination of volume by means of the. art. 51
Relationships of folair nutrients to growth of red pine in western Masschusetts. art. 337
Repellent, animal. Octamethylpyrophosphoramide (OMPA) as a systemic for Douglas-fir seedlings. art. 93
Reproduction and vigor. Electrical potentials related to, in slash pine. art. 116
REUKEMA, DONALD L. art. 192
Root connections, functional intraclonal aspen. Detection of by tracers and excavation. art. 386
Rooting of cuttings from mature Douglas-fir. art. 319
Roots, pine. Rough bark formation and food reserves in. art. 174
Rotation ages and stocking levels of loblolly pine. Estimation of. art. 471
Rough bark formation and food reserves in pine roots. art. 174
RUDOLPH, THOMAS D. For Sci. Monog. 4 (a separate)
RUDOLPH, V. J. art. 66
SANDERMANN, WILHELM rev. 282
SAVIN, N. E. art. 239
SCHMITT, DAN art. 302
SCHOMAKER, C. E. art. 66
Seed, Douglas-fir. Effect of photoperiod and light quality on germination of. art. 200
Seed, germination. Of sitka spruce. Effect of gibberellic acid on. art. 206
Seed separator. A laboratory. art. 222
Self-sterility in sweetgum. art. 302
SHIRLEY, HARDY L. rev. 329
SILEN, ROY R. art. 222
Simazine in red and white pine seedlings. Uptake and differential distribution of C^{14}-labeled. art. 330
Site-index curves. A stem-analysis approach to. art. 241
Site-index curves. Numerical construction of. art. 410
Six-year plot study on Douglas-fir cone insect population fluctuations. A. art. 124
SKAU, C. M. art. 283
Soil and atmospheric moisture on the growth of ponderosa pine. A measure of the effect of. art. 454
Solar radiation beneath conifer canopies in relation to crown closeure. art. 443
Spruce, black. An unusual witches' broom on. Caused by esatern dwarf mistletoe. art. 77
Spruce, black, unthinned. Foliage and wood production in northern Quebec. art. 80
Spruce-fir, forests. Minimizing windfall around clear cuttings in. art. 130
Spruce, sitka. Effect of gibberellic acid on seed germination of. art. 206
STAIRS. G. R. art. 397
STEPHENS, GEORGE R., JR. art. 28
Stem-analysis approach to site-index curves. A. art. 241
Stemflow. Absorption of by bark of young red and white pines. art. 277
Stemflow, interception, and throughfall in Utah and alligator juniper cover types of northern Arizona. art. 283
Stimulation of flowering in eastern white pine. art. 28
Stocking levels and rotation ages of loblolly pine. Estimation of. art. 471
STRAND, LARS art. 51, 410
Survival and pathogenicity of *phytophthora cinnamomi* In several western Oregon soils. art. 151
SWAIN, DONALD C. rev. 92
Sweetgum, self-sterility in. art. 302
TANZER, Ch. art. 463
TARKOW, HAROLD. art (rev.) 282
Throughfall, interception, and stemflow in Utah and alligator juniper cover types of northern Arizona. art. 283
Timber appraisal and log-grading. on. art. 239
Tracers and excavation. Detection of functional intraclonal aspen root connections by. art. 386
TRAUTMANN, W. L. art. 463
Tree grade potential. Of young red oaks growing in even-aged stands. art. 321
Triploid aspen tissue. The culture of isolated. art. 35
Types, forest. Of central New Foundland and their relationship to environmental factors. Some. For. Sci. Monog. 8 (a separate)
Unusual witches' broom on black spruce caused by eastern dwarf mistletoe. An. art. 77
Uptake and differential distribution of C^{14} labeled simazine in red and white pine seedlings. art. 330
Uronic acid, mineral composition and cation-exchange properties content of various tissues of conifers. art. 415
Variation, in tree stems. Causes and effects of horizontal density. Some. art. 24
Vegetative propagation of dwarf mistletoe art. 78

VEZINA, P. E. art. 443
VOIGT, G. K. art. 277
Volume tables. Weighted least squares method and construction of. art. 130
WAGAR, J. ALAN For. Sci. Monog. 7 (a separate)
WAGLE, ROBERT F. art. 454
WARD, W. W. art. 56, 321
WARREN, W. G. art. 267
Water table, effect of depth to. On height growth of tree seedlings in a greenhouse. art. 306
WATTERSTON, KENNETH G. art. 288, 463
Weevil infestation in relation to fertilization in white pine. art. 428
Weighted least squares method and construction of volume tables. art. 180
WEST, WILLIAM I. art. 371
WESTELL, CASEY E., JR. rev. 452
WHEAT, J. G. art. 319
WEETMAN, G. F. art. 80
WILDE, S. A. art. 463
Windfall, minimizing. Around clear cuttings in spruce-fir forests. art. 130
WHITE, DONALD P. art. 330
White pine and young red pines. Absorttion of stemflow by bark of. art. 277
Wood quality, of loblolly pine. Base lines for judging. art. 165
Wood production and foliage. In unthinned black spruce in northern Quebec. art. 80
XYDIAS, G. KENNETH art. 428
Xylem, secondary, in conifers. The developing architecture of. art. 89
Yellow-popular. Southwestern Michigan. Nutritional relationships affecting height growth of planted in. art. 66
Yields, sap and sugar. Chemical analysis of sugar maple sap and foliage as related to. art. 288
YODER, RAY A. art. 371
YOUNG, HAROLD E. art. (rev.) 276, 451
ZAHNER, ROBERT art. 361, 453
ZAK, BRATISLAV art. 214
ZAREMBA, JOSEPH rev. 114
ZWOLINSKI, M. J. art. 277
